

## Hydraulic Sheet Bending EHT 3000 x 9mm

### Description

- Make – EHT
- Model – EHPS 200 – 3550
- Max. press force – 2000 KN
- Table length – 3550 mm
- Distance between the stands – 3050 mm
- Stand projection – 350 mm
- Hydraulic ram lifts – 250 mm
- Distance table-ply sting hub – Max. 500 mm
- Lifting speeds: Empty – 100 mm
- Under load max. – 9mm/sek
- Retreat- 95mm/sek
- Parallel stop adjustment of tool centre – 5-1000mm
- Adjustment speed – parallel stop – 250mm/sek
- Parallel stop – lowering – 10mm
- Safety distance between tool and – 92mm
- Operating elements – 57 ms
- Follow-up time – 9mm
- Drive power of the main motor Y1 + Y- 8.5 kw
- Torque of the parallel stop X Torque of the inclined stop X – 3 N/M
- Max. pressure in the hydraulic system Max. – 285 BAR
- pressure in the pneumatic system – 6 Bar
- Contents of the oil tank- 390 Litre
- Operating voltage three-phase- 380 Volte 50 HZ
- Control voltage – 24 Volts
- Total connection value – 22KW
- Total direct current – 43AMP
- Rated current for the main fuse- 63AMP
- Weight of the machine- 16000KG
