

Paper Production Lines Voith

Description

Two Complete Paper Production Lines

Make – Voith

Working Width: Approximately 2500 mm

Basis Weight: 115–220 g/m² / 110–170 g/m²

Two modernized complete lines from Voith (modernized within the last 10 years)

A wide range of machine spare parts, including electric motors, slide valves, valves, stock preparation lines, winders, and steam boiler systems, are available for sale.

The mill specializes in the production of corrugated base papers and operates within the paper manufacturing industry.

The company offers a range of paper products, including test liner, kraft liner substitute papers, fluting papers, and innovative grass paper and grass board, all with a focus on sustainability and recycling.
